

Developed by the NAEMT, "National Association of Emergency Medical Technicians", this course is internationally recognized and well-received.

Target audience

All people in emergency relief, such as hospital workers (nurses, doctors), professional prehospital rescue workers and all health professional who manage critically ill patients.

Goal

With a hands-on approach, this course teaches how to assess and manage any medical emergencies, frequently encountered in prehospital environments and in admissions in the Emergency Department.

The goal of this training is to offer a management methodology based on a quick and systematic assessment.

After this course, the participants will be able to quickly identify a patient suffering from vital distress or who shows the warning symptoms.

Location

Within your company or on our training ground.

Duration

It's a 2 day-course with 16 hours of interactive theoretical presentations and role-playing.

**Training programme**

- Altered mental status
- Neurological disorder
- Respiratory dysfunction
- Management of shock
- Chest discomfort
- Endocrine and metabolic disorder
