

The NAEMT, and more specifically Life Support France, organizes courses under the aegis of the programme PHTLS, recognized worldwide in pre-hospital trauma education.

**Target audience**

The training is designed for the intervention units; military, caregiver and combatant staff, just as the health staff who could practice in a conflict zone.

**Goal**

The TCCC introduces evidence-based rescue techniques and strategies to provide the best trauma care on the battlefield.

The TCCC rely on the military book PHTLS and is fully compatible with the ministry of defense and the commissions on Tactical Combat Casualty Care (CoTCCC) from the american national guides. It is the only TCCC course approved by the College of American Surgeons.

**Location**

Within your company or on our training ground

**Duration**

It's a 2-day course, 16 hours including 3 theoretical hours and 13 hours of role-playing.

**Training programme**

- Vehicle or burning building extractions and moving to a secure area to treat burns
- Movements in emergency situations and application of first aid on oneself
- Hemorrhage and airway control
- Direct and Indirect Threat Care
- Hold a position

Upon successful completion of the course, the participants will receive a certificate valid for a period of 4 years.  
After that, they must attend a one day refresher course.
